

**AMENDMENTS TO THE CLAIMS**

1. (Currently Amended) ~~Stackable~~ A stackable carrier for growing ~~material~~ material, comprising:
  - a substantially rectangular flat plate; and
  - supports extending transversely of the flat plate from ~~the~~ short sides of the flat plate for ~~the purpose of~~ supporting the carrier in a stack of carriers, with interspacing for the growing material, wherein:
    - ~~wherein~~ the supports extend upward from the flat plate;
    - ~~wherein~~ under each of the supports, a recess is arranged in the ~~plate~~ carrier for receiving a support of an underlying carrier, whereby the carrier is also nestable during return transport or storing empty carriers with less space taken up by the carriers than in the stack;
    - ~~wherein~~ adjacently ~~of to~~ the recesses, the carrier ~~plate~~ is provided with a support surface for supporting underlying carriers; and
    - ~~wherein~~ the support surfaces are all ~~offset~~ offset in the same direction relative to the recesses.
2. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 1, wherein the carrier is provided, on its side remote from the supports, with locking elements provided for locking in horizontal direction the supports of the carrier placed above or below the carrier.

3. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 1, wherein the carrier comprises a frame extending at least at the periphery and a plate placed separately inside the frame.
4. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 3, wherein the frame encloses the plate in the horizontal plane and wherein the supports are fixed to the frame.
5. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim ~~[[1]]~~ 3, wherein the recesses are arranged in the frame.
6. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 3, wherein the frame is manufactured from metal.
7. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 1, wherein the supports arranged on either side of the carrier have a different shape, wherein similarly shaped supports of carriers placed on top of each other are nestable, and wherein differently shaped supports placed on top of each other maintain the distance between the carriers corresponding to the support height.
8. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 1, wherein the supports are each formed by a curved metal strip, and wherein the metal strips are connected to a surface of a profile extending parallel to an end wall of the carrier.

9. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 8, wherein the profile is an L-shaped profile and wherein the locking elements are formed by lips bent out of the L-shaped profile.

10. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 9, wherein the profile is an L-shaped profile and wherein the locking elements are formed by brackets fixed to the L-profile.

11. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 2, wherein the carrier comprises a frame extending at least at the periphery and a plate placed separately inside the frame.

12. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 4, wherein the frame is manufactured from metal.

13. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 5, wherein the frame is manufactured from metal.

14. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 3, wherein the frame is manufactured from galvanized steel.

15. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 4, wherein the frame is manufactured from galvanized steel.
16. (Currently Amended) ~~Carrier~~ The carrier as claimed in claim 5, wherein the frame is manufactured from galvanized steel.
17. (New) The carrier as claimed in claim 1, wherein a Danish trolley is arrangeable thereunder.
